Cache County historically has been driven by production, processing, and distribution of agricultural products. Because of this, it has a substantial dairy and meat products industry. Utah State University is an economic bulwork of the area, employing about 7,000. USU's research activity has spawned many companies that have added jobs. Because of the economic downturn, job growth has not been positive through 2009 and into 2010. Year over job growth did return to the positive side of the ledger in March. p = preliminary

Income and Wages

	2006	2007	2008	2009	2010
