

# Hiring Veterans is Good for Your Bottom Line

**VETERANS DELIVER.** They have a strong work ethic, exceptional training and proven leadership skills. They can fill any job that requires teamwork, discipline and leadership skills.

We all know a veteran who has served our county with honor and courage. Through the Utah Patriot Partnership Program, Utah businesses provide ongoing support by offering employment opportunities to our heroes upon their return. Employers who make the pledge of support to hire veterans receive recognition that includes a certificate from the governor.

The Utah Patriot Partnership Program isn't the only organization aimed at helping our veterans succeed. The ACE program is intended to provide an accelerated avenue for veterans to capitalize on their training and knowledge from their military occupational specialty and match those skills for certification in the civilian occupational codes.

If you are an employer, hiring a veteran can add to your bottom line. Employers can benefit from Federal Work Opportunity Tax Credits ranging from \$2,400–\$9,600 per veteran hired. For more information, visit [jobs.utah.gov](http://jobs.utah.gov).
