

Community Rehabilitation Program (CRP) Services

Billing for Services with the 2022 rate increase

Beginning July 1, 2022 new rates for Community Rehabilitation Program (CRP) services went into effect. The authorization and payment process should accurately reflect the services rendered by the CRP. In order to ensure that the payment process is completed with the new rate schedule please complete the following:

- Review the authorization for the services and fee rate.
- Determine the appropriate payment amount for the service. For example, the hourly coaching rate increased from \$40 to \$45 per hour.
- Provide an invoice to USOR that reflects the new rate.
- Please ensure that the invoice listing the services provided by the CRP and the amount billed matches the amount listed on the authorization (Box 2 “Billing for Services Rendered” on the authorization form). If there is an authorization in place for the old rates, the authorization does not require a re-issue. Rather, the invoice and box #2 need to match with the updated rates.
- Submit the invoice and authorization to the USOR district office.

** Following this process will reduce delays in payment.*
