The chart below is a list of schools that qualify for P-EBT as of the date indicated. Each school has reported the number of days there was a school closure due to COVID-19. This report captures the months of September 2021 through May 2022. Students enrolled in these schools, whom are eligible for free or reduced-price meals, will be issued a benefit for the number of days indicated each month. Benefits will be calculated by multiplying the number of days reported for each month times the daily P-EBT rate of \$7.10.

*Community Eligibility Provision (CEP)- Students are reported using a USDA formula from information obtained during the base year (1st year of implementation). Free and reduced meal applications are not collected to determine individual eligibility determinations in a non-base year. A free and paid percentage is applied to total enrollment. Every student receives free meals.

**Provision 2- One of three alternate provisions to make annual student eligibility determinations for free or reduced price meals. A percentage of free, reduced-price, and paid eligible students are determined during the base year (1st year of implementation). During the non-base years a free, reduced-price, and paid eligible percentage is applied to total enrollment. Every student receives free meals.

This chart represents the final data collection for school closure information as of May 27, 2022.
