Trust Fund Balance: (12/07/2023): \$1.203 Billion

Overall Tax Rate Calculation: (Benefit Costs/Taxable Wages) X (Reserve Factor) + Social Cost Rate

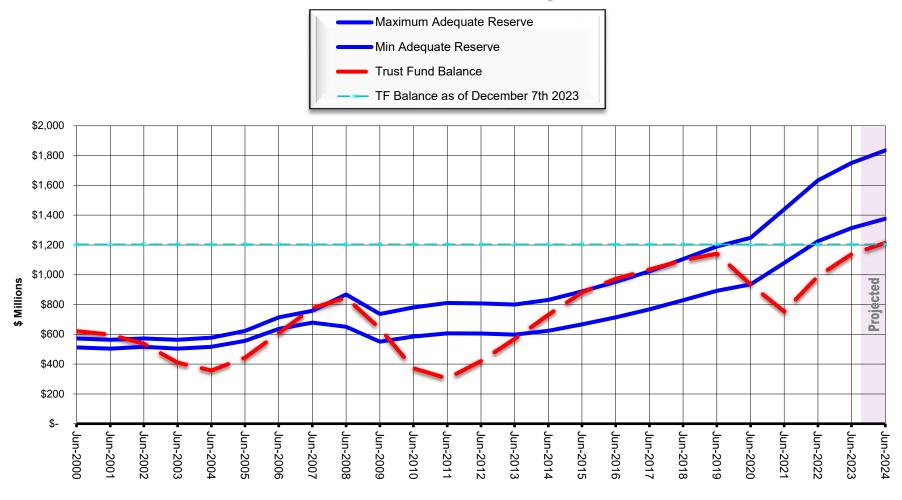

Reserve Factor: A multiplier (factor), which is adjusted up or down on an annual basis depending on the overall health of the UI Trust Fund balance. That formula is based on maintaining a balance in the Trust Fund that can fund 18 to 24 months of benefits during a severe economic downturn. The Reserve Factor is set at 1.0 when the Trust Fund balance falls between the Maximum and Minimum Adequate Reserve levels.

Social Cost Rate: This rate is determined by benefit costs that cannot be charged to specific employers and is added to the UI tax rate for all employers; this is the minimum tax rate available. The social rate is calculated using "social costs" for the previous four fiscal years.

Minimum Adequate: The minimum amount required to pay 18 months of benefits during the 5 worst economic years in the last 25 years.

Maximum Adequate: The maximum amount required to pay 24 months of benefits during the 5 worst economic years in the last 25 years.
