UTAH'S EMPLOYMENT SUMMARY: October 2021

The following statistics are presented comparing October 2019 to October 2021.

SALT LAKE CITY — Utah's nonfarm payroll employment for October 2021 increased an estimated 3.7% across the past 24 months, with the state's economy adding a cumulative 58,500 jobs since October 2019. Utah's current employment level stands at 1,640,700.

October's seasonally-adjusted unemployment rate is estimated at 2.2%, with approximately 37,400 Utahns unemployed. Utah's September unemployment rate is unchanged at 2.4%. The October national unemployment rate continued to decline, registering 4.6%.

Labor Market Indicators  
October 2021

**Utah**  
Employment Two-Year % Change: 3.7%  
Employment # Change: 58,500  
Unemployment Rate: 2.2%

**United States**  
Employment Two-Year % Change: -2.2%  
Unemployment Rate: 4.6%

Source: U.S. Bureau of Labor Statistics

"The labor market in Utah continues to get tighter and tighter" reported Mark Knold, Chief Economist at the Department of Workforce Services. "As people continue to fill jobs, the pool of idle, available labor keeps shrinking. At 2.2%, October's unemployment rate is Utah's lowest unemployment rate ever recorded. It is the outcome of an economy largely moving along at the forceful pace it did before the pandemic with a labor force that does not desire to be engaged at the same levels as it did before the pandemic. This makes for fewer available workers."

Utah's October private sector employment recorded a two-year expansion of 4.9%. Eight of Utah's 10 major private-sector industry groups posted net two-year job gains, led by Trade, Transportation and Utilities (20,900 jobs); Professional and Business Services (15,500 jobs); Construction (10,800 jobs); and Manufacturing (7,900 jobs). The two industry groups with less employment than two years ago are Leisure and Hospitality Services (-1,200 jobs); and Natural Resources and Mining (-1,200 jobs).

Note: Numbers have been left unrounded for convenience rather than to denote accuracy.

Note: Employment numbers are not seasonally adjusted. Therefore, comparisons of employment levels from one month to the next should not be used as job creation/loss estimates between those months. Seasonal factors could be the reason. For example, employment levels in September are usually higher than in August, as school employment resumes.
